DETAILED ACTION

1. Please update the claim status identifiers to the current status.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 6/29/2007 has been entered.

Information Disclosure Statement

3. The information disclosure statement filed on 9/20/2007 has been considered.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Okamoto (US-5,559,298).

Regarding claim 1, Okamoto teaches a tone generator system (Fig. 1 [17]) which generates at least one musical tone in response to sounding instruction data relating to a channel by using a program number (Col. 4 lines 12-16 "tone generation parameter") based on tone color changing instruction data designating a tone color of the corresponding channel which is stored in predetermined timing before a sounding instruction data, the tone color changing instruction data including a channel number and a corresponding program number, and the sounding instruction data including the channel number, (Col. 4 lines 28-31 and Fig. 6) comprising:

a first waveform storage that stores compressed waveform data, each of the stored compressed waveform data being readable based on the program number (Fig. 1 [12]), the compressed waveform data being compressed in a compression method for compressing waveform data in units of a frame comprised of a plurality of samples encoded with a format; (Col. 6 lines 40-42 and Col. 8 lines 58-60)

a second waveform storage; (Fig. 1 [13])

a sequencer that sequentially receiving and interprets a series of messages included in a musical composition file, supplies the tone color changing instruction data obtained by interpreting the series of messages, and then supplies the sounding instruction data obtained by interpreting the series of messages; (Col. 5 lines 7-13 and Fig. 1 [20])

a decoder responsive to the tone color changing instruction data supplied from said supplying section, for reading out from said first waveform storage the compressed waveform data based on the program number included in the supplied tone color changing instruction data, for decoding the readout compressed waveform data into waveform data in a pulse code modulation format (Col. 4 lines 41-45), and for storing the decoded waveform data in the pulse code modulation format into said second waveform storage, each of the stored decoded waveform data being readable based on the corresponding channel number; (Col. 5 lines 7-13 and Fig. 1 [21]) and

a tone generator section (Fig. 1 [17]) that is responsive to the sounding instruction data supplied from said sequencer, for reading out from said second waveform storage the waveform data in the pulse code modulation format, based on the channel number included in the supplied sounding instruction data, and for generating musical tones based on the readout waveform data in the pulse code modulation format. (Col. 3 line 51 through Col. 5 line 16)

Regarding claim 3, Okamoto teaches a tone generator system according to claim 1, wherein said second waveform storage is operable for storing waveform data inputted by a user. (Col. 4 lines 17-22 and Fig. 1 [13, 14, 15, 16 & 21])

Regarding claim 4, Okamoto teaches the decoder is operable for decoding compressed audio stream data inputted from an external device. (Col. 4 lines 17-22, 41-45 and Fig. 1 [16])

Regarding claims 5, the limitations of claim 5 are rejected as being the same reason set forth above in claim 1.

Regarding claim 6, the limitations of claim 6 are rejected as being the same reason set forth above in claim 1.

Regarding claim 7, the limitations of claim 7 are rejected as being the same reason set forth above in claim 3.

Regarding claim 8, the limitations of claim 8 are rejected as being the same reason set forth above in claim 4.

Regarding claim 9, the limitations of claim 9 are rejected as being the same reason set forth above in claim 3.

Regarding claim 10, the limitations of claim 10 are rejected as being the same reason set forth above in claim 4.

Response to Arguments

6. Applicant's arguments filed 6/29/2007 have been fully considered but they are not persuasive.

Art Unit: 2617

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew C. Sams whose telephone number is (571)272-8099. The examiner can normally be reached on M-F 7:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lester Kincaid can be reached on (571)272-7922. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
